

# #Website Layout Plan

## Collections

### Sidebar (Left Column) - Collections List

- This will be a **vertical navigation section** on the left.
  - **Position:** Fixed or sticky so that it's always visible while scrolling.
  - **Width:** Typically around **250px to 300px**.
  - **Background Color:** Light or dark depending on the overall theme.
  - **Content:**
    - **Title:** "Collections"
    - **List of Collections:**
      - Each collection can be shown as a clickable list item.
      - Optionally, each collection could have an icon to visually represent the collection.
    - **Search Filter:** Allow users to filter collections.

### Main Area (Right Column) - Book List of Collection in Grids

- This is the **primary content section** of the page.
  - **Position:** Occupies the rest of the screen, next to the sidebar.
  - **Layout:**
    - **Grid System:** Use a grid layout to display books (3 to 4 columns depending on screen size).
    - Each grid cell represents a book and should contain:
      - **Book Cover Image**
      - **Title of the Book**
      - **Publication**
      - **Short Description**
      - Optionally, a **"View Details"** button for more information on the book.
    - **Pagination:** Add pagination to load more books.
  - **Responsive Design:** Ensure that the grid layout adapts to smaller screens by stacking columns or adjusting the grid count based on screen width.

## Book Details Page

### Sidebar (Left Column) - List of Chapters

- **Position:** Fixed or sticky so it remains visible while scrolling through chapters.
  - **Width:** Typically **250px to 300px**.
  - **Content:**
    - **Title:** "Chapters" or "Table of Contents".
    - **Chapter List:**
      - List of chapters within the selected book, each listed as a clickable link.
      - Each chapter can be numbered (e.g., "Chapter 1: Title"), and links should be clickable to navigate to that chapter's content in the main area.
      - **Searchable list:** Provide a search bar to easily filter or find specific chapters.
-

## Main Area (Right Column) - Chapter Content

- **Position:** Takes up the remaining space next to the sidebar.
- **Layout:**
  - **Book Details:** Display the title & other details at the top of the content area.
  - **Chapter Title:** After book details, display the title of the current chapter in a bold font.
  - **Chapter Content:**
    - Display the full content of the chapter (text, images, etc.). If the content is long, consider implementing **scrolling** for the main area.
    - **Navigation Controls:**
      - **Previous Chapter** and **Next Chapter** buttons for easy navigation.
      - Optionally, provide a **Jump to Chapter** dropdown or button for quick navigation.
    - **Text Formatting:** Use clear formatting with headings, paragraphs, and possibly images or media.

## Key Functionalities & Styling Ideas

- **Sidebar:**
  - **Hover effects** for better user interaction (on collection items).
  - **Active state highlighting** for the selected collection.
- **Main Area:**
  - **Grid layout** with cards for books.
  - Use **card-style UI** for each book, with a hover effect for more interactivity (like enlarging the image or showing details).
  - **Responsive design** for tablet/mobile views (e.g., single column view on smaller screens).
